

CNC Electronic Technician

Production Equipment Specialties, Inc., an Orange County, CA, Aerospace CNC firm is looking to add a skilled Electronic technician to our team to work with us in servicing our world class clients. We have an immediate need due to company growth. This is a full time position requiring some weekend work.

Our ideal candidate would be able to utilize their knowledge of electrical systems to properly troubleshoot and resolve equipment and facility issues. This would include but is not limited to evaluating CNC machines, lathes, mills, HVAC systems, plant electrical systems and other types of facility support equipment. Typical work includes Fanuc control systems, Siemens control systems, input/output/ communications, and servo drives. We require a team member who can read machine electrical schematics and understand pneumatic components, process control units and feedback devices. In addition, the individual must be proficient in the use electrical test instruments and precision measuring devices.

We are a family owned and operated business where all of our employees become a part of our extended family team.

We offer a competitive salary with health insurance, vacations and other benefits.
