

CNC Machinist Wanted

Production Equipment Specialties, an Orange County, CA, Aerospace manufacturing and service company, is looking to add a skilled Machinist to our team to work with us in servicing our world class clients. We have an immediate need due to company growth. This position would be full time with some weekends as needed. Our ideal candidate would at minimum have a high school diploma and 5 years' experience with the following capabilities:

- Cheerful, problem solving attitude
- Set up and operate 3 & 5 - axis CNC Machines
- Familiar with Fanuc and Fagor controls
- Able to edit CNC programs
- Familiarity with Mastercam is a plus
- Understand and use precision measuring tools: Micrometers, height gage, etc.
- Able to read and understand drawings, electronic files and written instructions (set up sheets)
- Determine and complete set-ups
- Able to inspect work for dimensional accuracies
- Prepare layouts
- Trouble shoot and correct minor machine malfunctions and perform routine machine maintenance
- Design and build simple to complex jigs and work holding fixtures
- Perform complex machining operations
- Full understanding of Shop math requirements: Trigonometry and Geometry, etc.

- Adhere to all company performance standards
- Be interested in growing in the field by taking more classes and be eager to learn
- Safety awareness, high personal standards, team work capability, and good communication skills

If this sounds like you, and you are interested in working in a growing and exciting company we would like to talk with you!

Please send your resume and contact information to jerry.anthony.us@gmail.com.
